Build New Profile

A. Download Now

- Download Type: The main options you will want to consider are whether you want to download “All records” or only records between two specific dates.
- Options for this Download: The default settings are already set to what is optimal for most reports, but you can edit which types of registrations are downloaded.
***NOTE:** The 3rd, 4th, and 5th questions are the three that you would most likely want to customize. Leave the “Separate multiple-choice answers...” questions as having the defaulted “No” answer.*
- Click “Download File”
- Once the red “Retrieving Data” bar finishes scrolling across the screen, click “Download File”.
- A popup should appear giving you the option to open the file (choose Microsoft Excel) or “Save File”. Choose “open with” to open the report.

B. Build New Profile

1. Build Download Profile: Move each field you would like to download into the column on the right by either double clicking the field name or highlighting it and selecting the “>>” at the top of the page. You can select as many fields as you would like. Use the up and down arrows on the right side to put the fields you choose to download into the order you would like them to show up in your report. (Click “Next” on bottom right of page)

2. Define Download Fields: Here you can edit what will show up as each column header in your report. (Click “Next”)

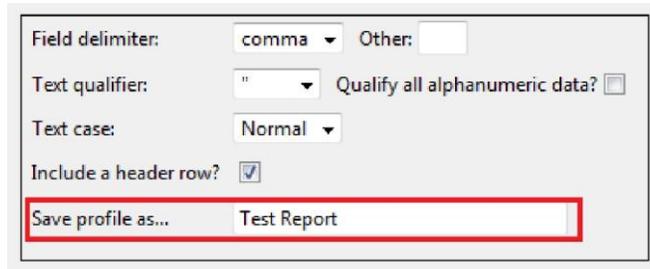

Column Header Name	Limit Character Values	Fixed-Width Field Length	Fixed-Width Field Length	Formatting Options
FirstName				
LastName				<input type="checkbox"/> Append to first name
Email				

3. Apply Filters to Download Profile: The page only comes up if one of the fields you selected includes answer options from which registrants were prompted to choose from. While you can filter out specific answer options here, **we strongly suggest you simply bypass this page (by clicking “Next”) and filter out the information you do not want directly from the registration report. This will ensure that no registrations are mistakenly omitted from the report.**

Apply Filters to Download Profile
